

Abstract

A quinoxalinone derivative of the formula (I):

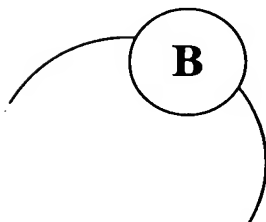

5 or a pharmaceutically acceptable salt or ester thereof, wherein;

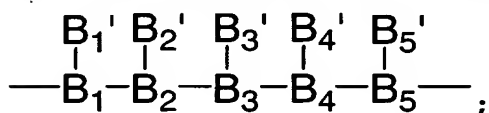

X is NH, S or the like;

Y is O or the like;

the partial structure

10 is, for example, the formula:

B_1, B_2, \dots, B_{n-1} and B_n , (in which n is 4, 5 or 6) are each independently CH, N or the like;

$B'_1, B'_2, \dots, B'_{n-1}$ and B'_n (in which n is 4, 5 or 6) are
15 each independently hydrogen or the like; and

R is hydrogen, lower alkyl or the like.
